

JOB POSTING

Position Title:	Electrical & Instrumentation Planner
Date Posted:	May 2, 2019
Location:	Mount Milligan
Reports To:	E & I General Foreman
Schedule:	7 days on 7 days off

POSITION OVERVIEW:

The Electrical & Instrumentation Planner will be focused on providing support to enhance the effectiveness of the mill operations and maintenance teams at the Mt Milligan mine.

RESPONSIBILITIES:

- Develops and communicates to all affected departments, daily, weekly, monthly and annual maintenance plans.
- Participate and lead as required root cause failure investigation analysis.
- Monitors implementation of the plan, and coordinates changes as required.
- Contributes to meeting equipment availability targets within department budget.
- Collaborates closely with the materials management department to ensure availability of required parts and materials.
- Generates Electrical and Instrumentation department performance (Key Performance Indicator) reports

QUALIFICATIONS:

- Instrumentation trades certification and a minimum of 3-5 years of varied electrical/instrumentation/process maintenance experience within the mining industry, or, an equivalent combination of education, training and experience.
- Have excellent written and verbal communication skills with all levels of the operation
- Strong computer skills with the ability to use integrated maintenance management systems
- Management of special projects and sub contractors
- Experience with MS Office software including MS Project
- Excellent oral and written communication skills
- Self starter and high-performance attitude
- Excellent interpersonal skills with the ability to liaise with mill and operations personnel and senior management
- Good work ethic and a strong attitude towards safety are essential requirements
