

Wynwood Expansion Project Tree Planting

Please be advised that Enbridge will begin planting trees for the Wynwood Expansion Project. Planting starts August 19, 2019 and is expected to continue until approximately September 7, 2019. During this time there will be additional traffic as it may be accessed off of Highway 97. Additionally, this work may be assisted by helicopters on the portions on the loop where access is limited.

CCI Inc., the general contractor, will be facilitating the planting. They will be on site and will require that traffic follows the local speed limits.
